

MAHNOOR SOHAIL

Software Engineering Student | Frontend Developer

Lahore, Pakistan | +92 320 1441227 | Sohailmahnoor52@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineering student and Frontend Development Intern with hands-on production experience shipping four live engineering builds — an offline-first e-commerce frontend, a 3D scroll-driven landing page, a real-time messenger UI, and an accessible headless component library. Scored Excellent (A), 85%, on the Khizex Frontend Engineering Internship. Skilled in React, TypeScript, Flutter, and Firebase, with a strong focus on accessibility, responsive design, and production-grade code quality.

EXPERIENCE

Web Development Intern

Aug 2026 – Sep 2026

Arch Technologies | Remote

- Selected for an 8-week Web Development Internship and Training Program focused on production-style frontend engineering tasks.
- Shipped real deliverables against sequential weekly build tasks, with structured feedback and scoring after each submission.

Frontend Development Intern

Jul 2026 – Aug 2026

Khizex Software Solutions | Remote

- Completed the Khizex Frontend Engineering Internship — Summer 2026, achieving an Excellent (A) grade with an 85% aggregate score across git discipline, code quality, technical defense, and public showcase.
- Built an offline-first e-commerce frontend using Service Workers, Web Workers, and IndexedDB for resilient state under flaky connectivity.
- Built a scroll-driven 3D landing page (GSAP ScrollTrigger + Three.js), scoring 9.5/10 on internal technical review.
- Built a real-time messenger UI (React 18, useReducer) and HeadlessHydra — a fully accessible, headless useCombobox React hook shipped as a standalone TypeScript library, deployed live on Vercel.

Frontend Development Intern

Jan 2026 – Feb 2026

Code Alpha | Remote

- Developed responsive interfaces and supported staff members in daily development workflows within an agile team.
- Analyzed workflow bottlenecks, proposed solutions, and contributed to feature development and presentation materials.

KEY PROJECTS

HeadlessHydra — Combobox Library — React 18, Strict TypeScript, Vite, ARIA

- Headless, fully accessible useCombobox<TItem> React hook with complete keyboard navigation, sync/async filtering, and multi-select support.

Ping — Real-Time Messenger — React 18, useReducer, Accessibility

- Chat UI with smart auto-scroll, live read receipts over a mock WebSocket transport, and aria-live regions for screen reader support.

Offline-First Shoe Store — React, Three.js, Service Workers, IndexedDB

- E-commerce frontend where cart state survives network loss, using a hand-written offline sync queue and a finite state machine to block checkout during pending sync.

3D Scroll-Driven Landing Page — React, Three.js, GSAP ScrollTrigger, Lenis

- Apple-style product page with a 3D model animated in lockstep with scroll position, with graceful fallback for low-end devices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, C++, SQL

Frontend: React, Three.js, Tailwind CSS, HTML5, CSS3

Backend & Mobile: NestJS, Node.js, REST APIs, Flutter

Databases: PostgreSQL, MySQL, Firebase Firestore, IndexedDB

Tools: Git, GitHub, Vercel, Figma, Adobe Photoshop, Linux

EDUCATION

BS Software Engineering

2023 – 2027

Superior University, Lahore | CGPA: 3.85 / 4.00

CERTIFICATIONS

- SQL Fundamentals — SoloLearn
- HTML Fundamentals — SoloLearn
- Volunteer Certificate (x2) — Alkhidmat Foundation
